Engineer/Specialist in Humanities, Japan Visa

Full-Stack & AI Systems Engineer with 5 years of experience building web applications, real-time backends, and self-hosted AI systems. Experienced in optimizing React performance (cutting re-renders by 60%), orchestrating event-driven RAG pipelines with Go/Python, and managing local LLM deployments. Based in Tokyo, comfortable working across hybrid, cross-functional engineering teams

Backend & AI Systems: Go, Python, Node.js, Qdrant, Redis, PostgreSQL, RAG Pipelines, Worker Orchestration.

Frontend & Mobile: React, React Native, Next.js, Tauri, Zustand, TanStack Query, Leaflet, Vite, Tailwind.

DevOps & Infrastructure: Docker, Linux, WebSockets, REST APIs, CI/CD.

EXPERIENCE

Software Engineer | Enon May 2024 – Present | Tokyo, Japan (Hybrid)

- **AI Agent & Event-Driven RAG Infrastructure:** Architected custom AI Agent skills using OpenClaw and Ollama, leading an event-driven RAG backend that orchestrates file conversion, OCR, embedding, data vectorization, and dynamic context retrieval.
- **Real-Time Communication & Streaming:** Implemented a low-latency event-driven architecture utilizing **WebSockets and Redis** to stream real-time task progress, status tracking, and interactive chat responses to the client.
- **Cross-Platform UI & File Management:** Built high-performance desktop and mobile interfaces using **Tauri** and **React Native**, developing intuitive workspace file/folder management and document uploads for the RAG memory system.
- **DevOps & Self-Hosted Infrastructure:** Built self-hosted Linux and Docker environments on private servers and NAS to run local AI models securely without relying on external cloud APIs
- **Tech Stack:** React, React Native, Astro, Tauri, Tailwind, Go, Python, NodeJs, Ollama, OpenClaw, Linux, Docker

Full-Stack Developer | Biomy Inc March 2024 – April 2026 | Tokyo, Japan

- **AI Geospatial & Canvas Performance:** Built high-performance Deep Learning visualization frontends from scratch, designing custom React hooks and tile-caching strategies for **Leaflet maps** to smoothly render complex cancer cell detection layers without frame drops
- **Performance Engineering:** Migrated legacy build architecture to **Vite** and implemented strict memoization, reducing component re-renders by 60% and establishing end-to-end testing with **Vitest** for mission-critical medical research workflows
- **Technical Stack:** React, Python, Ruby, Docker, Leaflet, Vitest.

Software Engineer | ControlRisks *May 2023 – March 2024 | London, UK / Panama City*

- **Enterprise Security Platforms:** Developed high-risk environment logistics and real estate safety audit systems using **.NET** and **React**.
- **Clean Architecture:** Refactored legacy components using **SOLID** principles and custom hooks, improving code reusability across global teams.
- **CI/CD Leadership:** Drove Continuous Integration tasks via **Azure DevOps**, constructing unit tests and streamlining the deployment pipeline for high-compliance projects.
- **Technical Stack:** React, .NET (C#), Azure DevOps, Storybook, SQL Server.

Frontend Developer | Live and Invest Overseas *January 2023 – May 2023 | Panama City, Panama*

- **Infrastructure Migration:** Led the strategic transition from WordPress to a headless **Next.js** architecture, setting up the foundation for a modern e-commerce and bookstore ecosystem.
- **Technical Stack:** Next.js, JavaScript, Stripe, WordPress.

Frontend Developer | ConsultiaIT *January 2022 – December 2022 | Panama City, Panama*

- **FinTech Development:** Engineered new functionalities for a major Nicaraguan bank platform, ensuring strict compliance with banking security standards and data handling protocols.
- **Quality Assurance:** Increased unit test coverage to **90%**, collaborating with backend teams to eliminate cross-stack bottlenecks.
- **Technical Stack:** React, Jest, E2E Testing (Playwright), REST APIs.

Software Analyst | Solusoft *January 2021 – December 2021* | *Panama City, Panama*

- **Legacy Migration:** Spearheaded the migration of financial management suites to **Oracle Apex**, writing complex **SQL** and **JavaScript** overrides to meet specific business logic requirements.
- **Technical Stack:** JavaScript, SQL, Oracle APEX, Jasper Reports.

EDUCATION

Computer Science Degree at Universidad Interamericana de Panama

LANGUAGES

Spanish - Native, **English** - Professional, **Japanese** - Informal conversation
